# Setting the timer on Mac computers

1. If the clock display is on (upper right-hand corner of screen) – single-click on it, and drag down to "Date & Time" to open

   If not, open the "Systems Preferences" folder, and single-click on the "Date & Time" icon to open

2. Single-click on the "Clock" tab

3. At the bottom, check the box "Announce the time ....." then click on the up-down arrows to select "On the hour" (or whatever timing is your preference)

4. On the right side, click "Customize voice" to activate it.

5. I found that the Bubbles were the least annoying of all the sounds.
